

MERCURY MERCUISER 4.5L, 6.2L and 8.2L SAFETY RECALL

Power Steering Pump Identification

The power steering pump is located on the front of the engine, as shown. If you are unsure of where the pulley is located on your engine, contact your Dealer to make an appointment.

- If the power-assisted steering pump pulley has windows (as shown below), then replacement is not required.

- If the power-assisted steering pump pulley does not have windows (as shown below) and within the affected serial range, then the pump **must be replaced**. Contact your Authorised Mercury Dealer to make an appointment.

- If you cannot easily determine whether the pulley on your engine has windows, contact your Authorised Mercury Dealer to make an appointment.
