

Hazard alert

Do your kids use a bunk bed?

To reduce the chances of your children being seriously injured in a bunk bed, make sure:

- only children over nine years of age use the bunk bed
- the top bunk has a guardrail around all four sides
- there are no gaps that could trap your child's head
- children don't use the bunk bed as a playground.

Consider using single beds as a safer alternative to bunk beds.

For more information, pick up the 7 easy steps for bunk bed safety flyer or visit www.fairtrading.qld.gov.au
