

### **Answer Dagger Fork Insert – Product Enhancement**

It has come to Answer USA's attention that there is a point at the threads that are not occupied by the top cap in early model Answer Dagger forks with a threaded top cap. There is not a safety issue with the fork as it passes all EN and all EU specifications, but in our constant development to enhance our Products, we've developed an insert that threads into the steer tube to double up that area and add extra strength. The Dagger Pro forks will all come with these inserts from now on.

Enclosed is a Fork Insert and Top cap for each pair of Dagger forks that you have purchased.

For fitting instructions, please refer to the Answer BMX Facebook page.
