

# VEHICLE PART SAFETY RECALL

## Hercules All Trac A/T Tyres

In its continuing focus on product safety, Hercules Tire & Rubber Company advises customers of a product recall on the following products in the Hercules All Trac A/T line of tyres:

Size	Serial Number
LT215/85R16 115/112S E	JEHMECL5008-4010
LT235/85R16 120/116S E	JEKMECL4708-4010
LT245/75R16 120/116S E	JEJKECL4608-4010
LT265/75R16 123/120S E	JENKECL4808-4010
LT265/70R17 121/118S E	JENJFCL5108-4010
LT245/75R17 121/118S E	JELKFCL5008-4010
LT225/75R16 115/112S E	JEJKECL5108-4010

The tyres have 16 or 17 inch (40.5 or 43 cm) rim diameters and are sold primarily for commercial use on light duty trucks. The products have been sold by authorized tyre dealers nationally since March 2009. Consumers may identify these tyres by the type, size, and 11-digit serial number printed either on the outside or on the inside of the tyre.

**DEFECT:** Tyres within the ranges described above, if affected by the issue, can experience in-service belt and tread separations.

**HAZARD:** Should a separation occur, the driver may experience a vibration and/or a flat tyre. In some circumstances, the driver may lose control of the vehicle without warning, which could increase the risk of a vehicle crash.

**WHAT TO DO:** Hercules Tire will arrange for the tyres described above to be replaced free of charge, including mounting and balancing, if needed. Hercules Tire distributors will contact consumers with more information about how to arrange for tyre inspection, replacement, and service. Owners may contact Hercules Tire distributors or dealers for more information about this recall.

See [www.recalls.gov.au](http://www.recalls.gov.au) for Australian product recall information.
