

Mandatory Safety Zip Information for Bean Bags

The Neo Bean bag range is designed for safe fun for ages 8+ in swimming pools.

It has come to our attention that the removable plastic loop on the outer zip and the tab on the inner zip may still be in place on the Star, Disc and Comfort Lounger models and they will need to be removed IMMEDIATELY before further use.

As stated on the warning label: Small Lightweight Beads Present a Severe Danger to Children if Swallowed or Inhaled

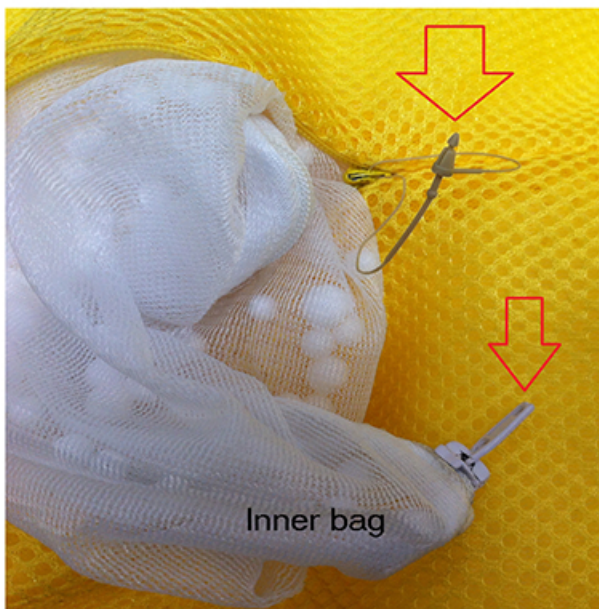

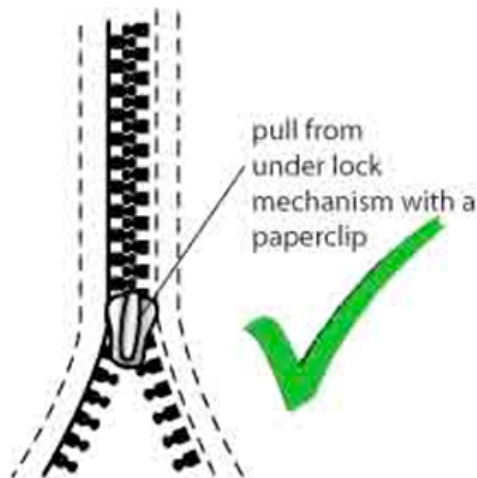

What to do? Owners are advised to inspect and rectify if necessary.

The plastic loop can be cut with household scissors and removed.

Then twist the inner tab until it snaps and is able to be removed.

If you are unsure how to do this the please return to point of purchase and they can remove for you.

It is Newline's goal to provide safe leisure equipment and ensure Australian safety standards are met. If you require further information please email newline@newlineproducts.com.au

Unzip and cut the plastic loop off the outer zip, if the inner zip has a tab attached please twist the tab and remove it from the zip. A paper clip can be used to close the zips as required but ensure it is removed when complete.
