

Product Safety Recall

COLLEGIATE SADDLES

Sold between 08/03/2016 – 25/10/2018

Defect There is an inconsistency in the way girth points have been attached to the saddle.

Hazard If the girth points are not correctly attached, they may detach from the saddle, which could lead to an injury for the rider.

What to do Customers should stop using the saddle immediately and contact Horseland for repairs.
