

# Product Safety Recall

## TC Electronic 250W Bass Amplifier

Amber Technology takes product safety very seriously and wishes to advise customers of a recall on the following product:

### TC Electronic 250W Bass Amplifier

Model No.

# BH250

### Defect:

Unfortunately a small error has been discovered in the assembly process of the first run of the BH250 micro bass amplifier head. This might have caused two nuts inside the affected units to not be tightened properly.

### Hazard:

If these two nuts loosen or detach, in exceptional cases this may create an electrical safety issue.

### What To Do:

Customers should, as soon as possible, return their BH250 directly to Amber Technology for assessment. Affected units will be repaired or replaced at the discretion of Amber Technology, with no additional cost to the customer. Customers should contact Amber Technology on 1800 251 367 to arrange a return authorisation prior to returning their unit.

Amber Technology apologises for any inconvenience caused.
