

Product Safety Recall

Tomme Tippee Super Soft Comforters 12m+

This recall applies to Tommee Tippee Super Soft Comforters age 12m+ purchased from late May 2016 with packaging marked with SKU number 270145 and batch code 09116JC, 08516JC, or 12316JC. The shield of the comforter measures 50 millimetres across. The previous version of the same product line, still available at some retailers, is **not** recalled (its shield is more rectangular shaped and measures 56 millimetres across).

Defect: In the event that a child takes the whole comforter into their mouth, the shield and teat size combination may allow the comforter to get positioned in the back of the mouth.

Hazard: If the comforter is taken into the back of the mouth in a certain position, it may pose a risk of choking.

What to do: If your comforter matches the above description, please immediately stop using it and follow the instructions at www.tommeetippee.com.au/comforter-recall/ to obtain a refund or replacement. A comforter for this age group with a larger shield size will replace the recalled comforter. Customers without access to the internet can call 1800 096 938.

Contact Details: You can contact Mayborn (Mayborn ANZ Pty Ltd) at www.tommeetippee.com.au/comforter-recall/ or by phone at 1800 096 938.
