

Product Safety Recall

Quantify qBlind

Blind Controller

PN01-A008-01 , PN01-A008-02

Identification: The product was sold through Harvey Norman Commercial Division and Fokused between 31st July 2019 and 25th June 2020. The units will have product number PN01-A008-01 or PN01-A008-02 marked on the front face of the device. In addition to this, a label with “Blind Controller Only” will be visible on the front face.

Defect: A surge protection component was found to be operating during normal operation leading to the failure of the component. The motor or the electric circuitry might be damaged.

Hazard: Risk of fire if the surge protection component overheats excessively which could lead to damage to the blind motor connected to the Blind Controller and serious injury.

Action Required: Consumers should immediately stop using the blind controller and contact Quantify Technology to arrange modification.
