

Product Safety Recall

COLLEGIATE SADDLES

Sold between 08/03/2016 - 22/01/2021

These saddles were previously recalled on 20 November 2018 under PRA2018/17153. Saddles that were previously recalled will need to be inspected again

Defect The girth points may not have been attached to the saddle correctly. When the saddle was previously recalled and replacement screws installed, not all the screws may have been replaced.

Hazard If the girth points are not correctly attached, they may detach from the saddle and the saddle may no longer be secured to the horse, which could lead to an injury for the rider.

What to do Consumers must immediately stop using the saddles and return the saddle to the nearest Horseland store for an inspection. If affected the saddle will either be replaced, repaired or refunded.

Contact details For further information, please contact the Collegiate recall helpline on 1300 319 000 or email info@collegiatesaddlery.com.au
