

# Product Safety Recall

## Pool Table Irons

Sold between December 2018 and October 2020  
by Mal Atwell Billiards and Bingo (WA), Consolidated Leisure and Sport Pty Ltd (Vic)  
and manufacturers and sellers of pool tables

Electric iron for smoothing pool table surfaces. Iron has a green body and with a heat insulating surface between the body of the iron and the ironing surface. Iron rests on a heat resistant pad.

**Defect:** The heat control pad and the heat resistant stand of the iron contain asbestos. Asbestos fibres may be released if the iron is disassembled, under certain types of use or with time as the iron and stand are handled and used.

**Hazard:** If asbestos fibres are released into the air and breathed in, they can cause serious medical conditions, including asbestosis, lung cancer and mesothelioma.

**What to do:** Owners of the affected irons should cease using the irons immediately and contact the place of purchase for further advice. Consumers must not attempt to maintain, disassemble, modify or repair their irons. After contacting the place of purchase or the supplier of the iron, owners may wish to contact an asbestos disposal expert to arrange safe handling, storage, transportation and disposal of the iron at a facility that handles hazardous waste. Further information about disposal of asbestos waste can be obtained from local government authorities, the relevant environmental protection agency or waste disposal authority in your state or territory. Owners of recalled irons will be provided with a replacement iron that does not contain asbestos.
