

# ELECTRICAL SAFETY RECALL

240V AC Powered Sliding Gate Opener Motor suitable for gates up to 1200kg  
Richmond Wheel & Castor Model GTR156

## IDENTIFICATION:

The gate motor assembly is mounted on a metal frame and has a plastic housing covering the motor and electrical components. It does not state the model number on it but visually looks like the one shown above.

Sold between 01/11/2017 and 30/09/2022 at Bunnings, Richmond Wheel & Castor Co and AdMerch. This recall does not affect any other models.

## DEFECT:

The main supply cord may be incorrectly wired to the power terminal block.

## HAZARD:

Risk of electrical shock causing serious injury or death.

## ACTION REQUIRED:

Consumers should open their gate and immediately **stop use** of the GTR156 powered gate opener and **unplug it from the power supply**.

Consumers should visit the Richmond Wheel and Castor Co website at <https://www.richmondau.com/gtr156-safety-check/> to access and download instructions on how to operate their gate manually and what steps to take to confirm if their gate motor is affected.

Consumers can obtain assistance in identifying if their gate motor is affected by this recall, by uploading pictures of their gate motor at <https://www.richmondau.com/gtr156-safety-check/> and following the instructions as directed. A service technician will contact you once they have reviewed the images provided.

Richmond Wheel & Castor Co will respond to all consumers to confirm if their gate motor is affected or not. If affected, arrangements will be made for a technician to visit consumers and carry out the necessary, repair onsite.
