### Reason the product is recalled

The fan wheel in affected units may fail, which could result in breakage. This may lead to fragments being ejected from the blower, posing a risk of injury to the operator or bystanders.

### The hazards to consumers

Risk of injury from lacerations or cuts if the fan wheel in affected units fails and the operator or a bystander gets hit by ejected fragments.

### What consumers should do

1. Stop using affected blowers immediately
2. Return affected blowers to an [authorised STIHL workshop](#) for a free inspection and repair.
