

Product Safety Recall

Thule Omnistor TO 8000, Thule Omnistor 9200 and 230V Motor Kits

Noting that the label affixed to the awning motor reads 220V

Sold by authorised Thule NV dealers
between 01/06/2016 - 31/08/2019

Defect The drive wheel may separate from the awning motor. If this happens, the awning may open unintentionally or in an uncontrolled manner.

Hazard If the awning opens unintentionally or in an uncontrolled manner, especially while driving, it may pose an accident or injury risk to bystanders, vehicle occupants and other road users.

What to do Consumers should secure their awning from risk of unintentional opening until the product can be repaired. A fixation kit can be requested by emailing thule-recall230V@thule.com. Affected consumers will be directly contacted by Thule NV or the dealer that sold the product to organise for it to be repaired, at no charge.

Contact details For more information, consumers may contact the place of purchase, or Thule NV directly on thule-recall230V@thule.com or at <https://www.thule.com/en-au/safety-notice/recall230v>
