

Safety Zip Instructions for Bean Bags

Wassco Bean Bags are designed to represent the safest portable chair for your baby.

It has come to our attention that the puller rag on the inner zipper (second zipper, not outer) on Wassco Baby Bean Bags may still be in place on some models and this would need to be removed IMMEDIATELY before further use.

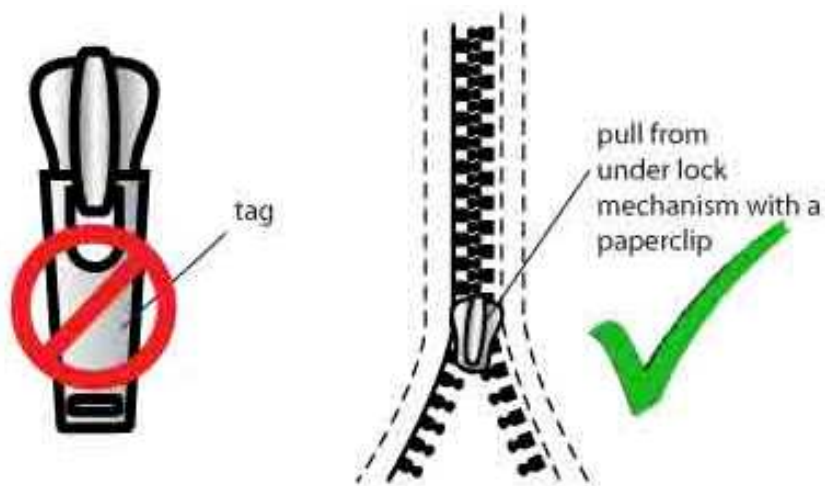

As stated on our warning label: WARNING Small Lightweight Beans Present a Severe Danger to Children if Swallowed or Inhaled.

What to do: Unzip the first safety zipper with a paperclip, if the second inner zipper has a puller attached please twist the puller to snap it and remove it from the zipper.

Remove the paperclip after closing the zip.

Twist the puller on second zip until it snaps and is able to be removed.

If you require further information please contact Wassco sales@wassco.com.au

Unzip the first safety zipper with a paperclip, if the second inner zipper has a puller attached please twist the puller to snap it and remove it from the zipper. Refer to information above.
